

Sabin Chambers

Young industrious web developer with a love for expressing his creative passions through code. I have spent my time studying, testing, and developing practical, visually appealing, responsive websites and handy applications. Excited to pursue new commercial opportunities to grow my skills while continuing to develop applications I'm enthusiastic about.

NOTEWORTHY PROJECTS

Chat App — Personal

July 2022 - August 2022

- A fast moving and secure live messaging application.
- Makes use of Next.js' Server Side Rendering and Firebase for Database and File Storage.
- Utilizes Next Auth via provided Google credentials for authentication.
- Supports 1-on-1 chats as well as Group Chat.

eCoffee — Personal

December 2021 - April 2022

- An eCommerce and Blog platform centered around coffee and creative writing.
- React Redux handles State Management in an orderly manner.
- User Registration, Login, and actions are verified with JWT
- MongoDB stored passwords are salted and hashed with Bcrypt.
- React Quill makes for a great Rich Text Editor, so users have the ability to publish HTML in their blog posts for headings, bold, italics, etc.
- Checkout is handled by the user's choice, either PayPal or Stripe API.
- NodeMailer and Google API allow the user to have a receipt emailed after they place an order.
- Lastly, it is equipped with an Admin Panel that is of course secured by an admin token and allows this user to perform CRUD operations on user, order, and product data.

E-Line,FL — Freelance

January 2022 - February 2022

- MERN stack webapp
- Developed and designed front and backend sales funnel with a focus on minimizing button clicks to checkout for high customer conversion.
- Fully equipped with a secure Admin Panel for managing all the
